

This guide shows you some of the possible setups with your BDS 4x sling.

The sling is easy to setup but it's nice to have some pictures and instructions sometimes so that is why we created this simple guide.

2 point sling with straps setup

Quick adjust strap
goes in front

No rear sling connection point

The extra strap included is for attaching to rifles that are missing a rear sling connection point.

You can wrap the strap around the handle as pictured below and easily add a rear connection point.

2 point sling setup

Receiver End Plate Loop Sling Mount Adapter

This accessory lets you put a single point sling point on your rifle.

****This is something you'll need to purchase****

Quick attachment setup

Wood stock sling setup

If your rifle does not have a sling loop, you can strap both ends around the stock.

Once again please let us know if you have any questions or issues...we'll take care of you!

Amazon thrives on customer feedback and reviews. We would appreciate it if you could leave us one when you get a moment. If you already left us one, THANK YOU!

Enjoy your sling and be safe,

Gabe Lee
